JUNIOR CLASS NEWS

The Junior Class of A. H. S. held a class meeting on Tuesday, May 14, to elect delegates to attend Boys' - Girls' State July 14-20. These delegates and alternates had to meet certain qualifications before being eligible. Aaong these were leadership, cooperation, honesty, scholarship, character and physical fitness. Local organizations and clubs sponsoring this project are American Legion Post 104, Lions Club, American Legion Auxiliary, and Woman's Club.
The delegates are: Richard Robinson, Kinckle Martin, Laura Carson and Norma Hillsman.
The alternates are: Moses Dinkins, Ralph Inge, Joella Ferguson and Rachel Austin.

QUESTIONS OF THE WEEK

(Editor's note: Here are the questions asked most frequently by Virginia farmers during the past week, as reported by county agricultural agents. Answers are supplied by staff members of the VPI Agricultural Extension and/or Experiment Station).

Q. How can I control insects in my garden?

A. For most garden insects, use 3 level tablespoons of 5% rotenone powder to each gallon of water as a spray, or a ready-prepared dust containing 3/4% rotenone. To control aphids, harlequin bugs, squash bugs, and green stink bugs, use malathion dust or spray according to directions on the container label. Use 5% DDT dust for potato insects. A general purpose dust containing zineb and methoxychlor, or copper and rotenone, will control most insects and diseases.

Q. How much damage will the adult alfalfa weevil cause and will I have to spray my second crop of alfalfa?

A.- The adult weevil is not expected to do very much damage to the second cutting of alfalfa. However, it is migrating into adjacent crops, such as soybeans, clover and garden crops and can cause heavy damage there. If this is happening in your area, spray the crop into which the weevil is migrating. Use heptachlor at the rate of 1-2 pound in 20 gallons of water per acre. If pastures are sprayed, do not graze them for 12 to 14 days after treatment.

Q. What is the newest and best variety of soybean

A. Lee is the newest, and is shatter-resistant and high - yielding. However, it is not necessarily the best. This will depend on many local conditions, and may vary from year to year.

Q. What is the best way to control tent catedpillhrs?

A. Spray the foliage of affected trees with DDT or arsenate of lead.

Q. How can I kill Johnson grass?

A. For large-area spraying, use TCA at the rate of 80 pounds per acre, or dalapon at the rate of 40 pounds per acre. For spot spraying, use TCA at the rate of 8 ounces, or dalapon at the rate of 4 ounces, per square rod.

Q. Why can't I get as good a stand and yield of lespdeza hay as I could a few years ago

A. Check fertility and pH of your soil and your time and rate of seeding. Lespedeza is not generally a hard crop to grow if recommendations are carefully followed.

IN FASHION NOW

It takes all kinds of people to make up this big world of American fashion. You need only attend showings of six or eight well-liked American designers to see how true this is.

There are at least several designers catering to the individual taste of each American woman. All you need to do is to study clothes in reference to line, neck, styling, etc. — to find a type designer whose clothes do the most for you.

The problem of fit can almost always be solved if you search out the right creator.

As your figure changes from time to time, you will find it necessary to discover other designers whose clothes look best on you.

It is not vain to give thought and consideration to your clothes. It will save you money, both on the article purchased and by eliminating costly alterations. This will make a big hit with hubby.

This same advice applies to any piece of clothing we wear. Shoes by certain designers, are more comfortable for you than others, etc. Your problem is to find the ones best suited to you, and then stick to them.

Industrial output declined slightly in April.

Appomattox is a growing town.

Subscription rate: $2.00 a year; payable in advance.
